A Good General Purpose Glass

A good glass is indispensable to the bird-watcher today, whether as a means of determining which birds are fighting the insects in one's garden, or as a hobby-tool for the business man seeking the haunts of ducks and other game birds.

The 4× Companion Field Glass is an excellent glass for elementary bird study. It is particularly recommended for Boy Scout or Girl Scout work, as it is small, light, easy to handle and moderate in price.

Bausch & Lomb SPORT GLASS

The Bausch & Lomb Sport Glass is an aid wherever clearer vision and wider view are desirable. The seat in the balcony is on a par with the orchestra when the Sport Glass is included in the party. That fast play in the far corner of the field comes near the stands when the Sport Glass is brought into use.

The Sport Glass is finished in handsome, durable, black calfskin, with case to match. Light in weight and compact in size, it has the widest field of view of any glass of its type—840 feet at 1000 yards.

Wide field, clear vision and all the magnification you need are the practical features of the Sport Glass.

Price, complete with case... \$16.00

Bausch & Lomb COMPANION GLASS

The Companion Field Glass is light and compact—can be carried conveniently in your coat pocket—small enough to be tucked out of the way in your car, boat or plane. Only one hand is required to hold and focus it.

Its four times magnification is ideal for a general purpose glass. You can distinguish objects four times as far away—see four times as much as you can see with the naked eye.

The Companion has attractive black enamel and grained, vulcanized rubber finish; ample field of view; weighs only 10½ ounces and is 3¼ inches long. Complete with an attractive, durable, leather case and shoulder straps. You will be proud of the Companion in any company. Examine it at your optical or sporting goods store.

Price, complete with case and straps..... \$17.50

The Traveler's Friend

The distant view so hard to see from a moving train or boat becomes clear and brilliant with a surprising steadiness and magnification when you use the Sport Glass.
