Here is a binocular that commands attention because of its attractive design, fine construction, superb optical qualities and its remarkable low price considering that the nearest competitive model now retails for \$70.00.

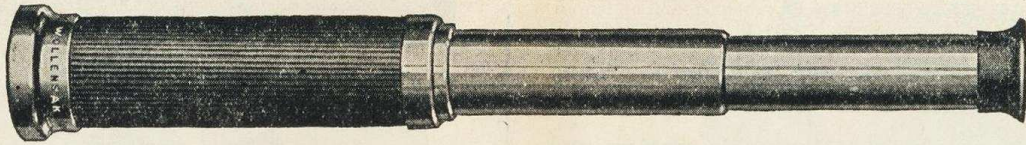

The bright illumination and clearness of vision will amaze you. For some time there has been a gradual but steady increasing demand for a high power, light weight binocular. Recent sales records indicate that the trend is away from heavy cumbersome glasses. To meet this demand we offer for the first time the FEATHERWEIGHT.

A binocular constructed of a special featherweight aluminum alloy as rigid as steel though weighing only 14 ounces. The optics are the work of Europe's finest craftsmen and recognized the world over.

No. 1937—Complete with camera type leather carrying case, and neck and shoulder strap **\$31.95** Each

WOLLENSAK ACHROMATIC TELESCOPE

6 Power

Never before has an Achromatic Telescope been offered at this price.

Larger, clearer field of view. Brings all objects six times closer. Sharp focus.

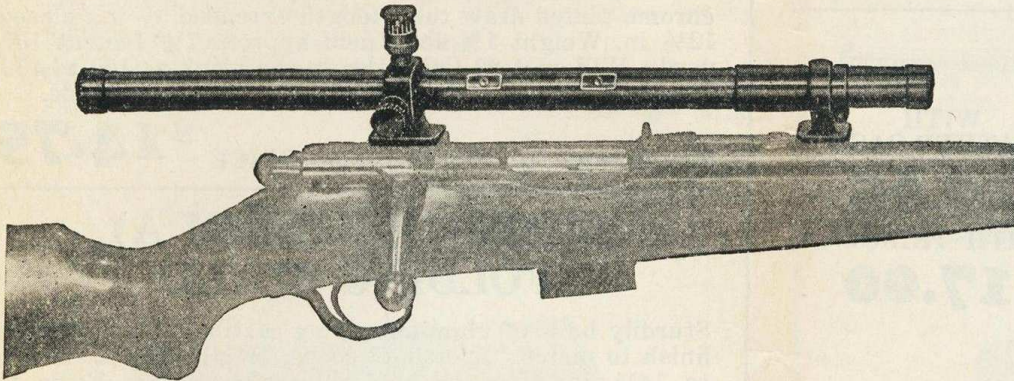

The immense advantage of American mass production methods over cheap foreign hand labor is strikingly shown in this new telescope. Compared to foreign made unachromatic instruments claimed to magnify 6 times, the Wollensak Achromatic Telescope shows many superior features.

The Wollensak Achromatic Telescope, fully extended is only 9¼ inches long and weighs only 5 oz.

Looking 1000 yards away, the visible view is actually 52 yards across—an unheard of field of view in a telescope of this power. A man so far away that he appears less than a foot tall is seen in his natural size through the Wollensak Achromatic Telescope. All objects are magnified 6 times.

Complete with Genuine Leather Case..... Only **\$2.15**

WOLLENSAK RIFLESCOPE

A NEW
4 POWER
RIFLESCOPE

For Rifles from 22 Cal. to 405 Cal. **\$8.50**

This four power riflescope makes the target or object appear four times larger or four times closer, thereby making it easier for the shooter to see exactly where he is sighting.

A riflescope is humane in hunting, it permits the vital part of the animal to be sighted, allowing the kill to be made with more accuracy; it promotes steadiness and makes target and small game shooting very sporting and more fascinating and intriguing.

The five lens optical system gives high light transmission and clear view. Each scope is focused at the factory to reveal objects clearly from close-up to infinity without further adjustments.

The rear mount holds the scope in three point suspension and is equipped with micrometer screws for wind-angle and elevation adjustments.

The front mount has a sleeve and spring plunger which engages in a groove to prevent the scope from rotating in the mount. Provisions are made however, to permit the scope to slide when subject to recoil.

Bases for holding mounts to rifle are accurately machined and supplied with screws ready to attach, and are made in various sizes to fit practically all rifles.

A TELESCOPIC SIGHT IS ONLY AS GOOD AS ITS OPTICS

Wollensak Telescopes

TELESCOPES enable us to see farther and see more with greater clarity and without eyestrain. They transport the point of interest to your vision instantly.

Wollensak Telescopes have achromatic optics and produce a wide field of view with crispy sharpness, free from objectionable color fringes and distortion usually found in cheaper telescopes.

The draw tubes are chromium plated for permanence and durability. They are mounted in felt which assures smooth-action, true-fitting, and quick, accurate focusing. Each instrument is supplied with leather case.

WOLLENSAK SPOTTING SCOPE

WITH LEATHER CASE
\$10.65
 WITH TRIPOD
\$17.00

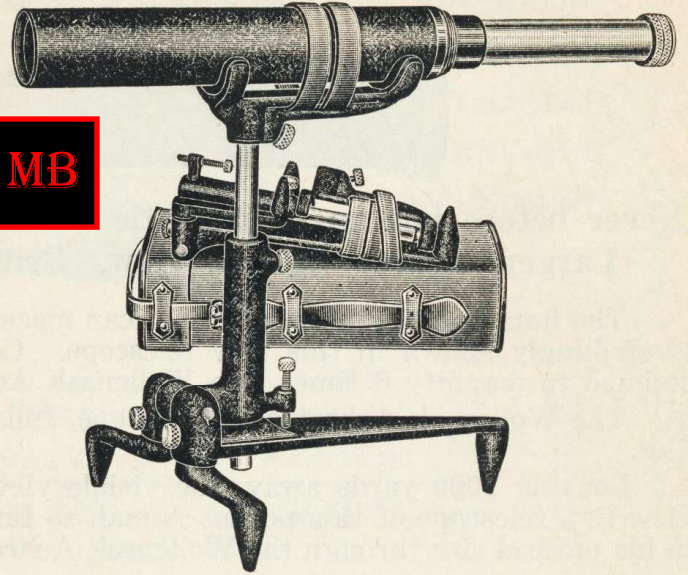

A 20 power scope designed for pistol and rifle shooters who are looking for quality at a reasonable price. It will clearly spot a .22 caliber hole in the black at 100 yards, and at this distance it covers a field of 6 1/2 feet. The Wollensak Spotting Scope will focus as close as 15 feet and therefore it is equally as well adapted to the short indoor ranges.

The spotting scope has three draw tubes which are chromium plated and slide in smooth acting felt that makes for ease and accuracy in focusing. Fully extended it measures 24 5/8" and collapsed only 8". It has a thorough, achromatic optical system (freedom from color) that gives good illumination and a crispy, sharp field of view. The objective lens measures 1 7/16" in diameter.

Besides its usefulness as a spotting scope it is also an excellent observation telescope for hunting, at the summer home, camp and general field use.

NOTE—Wollensak goods all specially priced.

MOSSBERG (Model A) "SPOTSHOT"
