LAFAYETTE'S ASTRONOMICAL VALUES for the International Geophysical Year

3 IN. REFLECTING TELESCOPE

• ADJUSTABLE EQUATORIAL MOUNTING
• MIRRORS ACCURATE TO 1/4 WAVE LENGTH

• ALUMINIZED AND QUARTZ OVER-COATED

The finest 3" reflecting telescope available for the astronomer with a limited budget. Prepared to the specifications of outstanding experts. The only 3" telescope available with an adjustable equatorial mount—precisely calibrated—aluminum-aluminum and quartz over coated mirrors guaranteed accurate to 1/4 wave or better. Adjustable for precise tracking in Right Ascension and Declination. Smoothly adjustable tube. All settings carefully machined and assembled. The most liked, ideal for the beginner and amateur astronomer. Good for observation of Moon craters and mountains—Saturn's rings—Jupiter's satellites—double stars—clusters—and reflex. Comes with instructions. Ship. wt., 12 lbs.

IMPORTED BINOCULARS WITH COATED ACHROMATIC LENSES AND PRISMS

Lafayette has gone "all-out" to present these fine, imported Zeiss type binoculars of beautiful outward of finish. Each of these extremely precise optical instruments have coated lenses—clamped in great (or glued) prism—light weight alloy—oil metal bodies—weather proof, lens great solar coverings—maximum light transmission—minimum distortion. Made by leading optical manufacturers to get you rapid specifications. Whether you are a yachtsman—hunter—fisher—sports fan—or a bird watcher—you'll find the binoculars you need in Lafayette's great selection. And Lafayette's famous money-back guarantee applies as always.

FOCUS—mechanism is either central focus (C.F.) by means of a single wheel and one adjustable eye piece, or individual focus (I.F.) wherein both eye pieces are separately adjustable.

POWER—is the number of times an image is magnified through your binoculars. For example 7X 35 means the object will appear 7 times larger (or closer) than with the naked eye. The second number used (i.e., the "35" in 7X 35) is the diameter in millimeters of the objective lens.

COATED LENSES—used to reduce reflection and pass up to 50% more light than uncoated lenses.

Includes Ward Flexible case
